

Presentation'Touch

by after-mouse.com

\$10,000

AFTER-MOUSE.COM is a world leader in development for Samsung SUR40 with Microsoft® Pixelsense™, and Windows® 7 and 8* platforms. Presentation'Touch is a customized tactile solution to help you showcase your content and interact with users in a unique way. The base price of **\$10,000** includes the background, content container, and one method of content sharing. Other features can be added for a supplementary fee; AFTER-MOUSE.COM can customize Presentation'Touch to meet your specific needs.

Included in Package:

Custom Background. Any JPG or PNG image you provide, in full HD.

Content Container. Let users discover your company, your message, your brand! Presentation'Touch streamlines your content into a beautiful and easy to use interface that leaves a lasting impression.

- **Film Strip and Stacks.** Users can access content by making a “drag and drop” motion from the content strip or stack.
- **Explore Videos, Images, and Interactive Brochures!** All content is freely movable, scalable, and rotatable with a simple touch.
 - **Videos.** Must be provided in WMV format, maximum of 10 included in the base price.
 - **Images.** Must be provided in JPG or PNG format, maximum of 50 included in the base price.
 - **Interactive Brochures.** Must be provided in XPS format, maximum of 5 brochures included in the base price.

Film Strip Content Orientation

Stacked Content Orientation

Interactive Brochure

Sharing. One of the below options is included in your base price. Include both sharing options for an additional \$3,000.

- **Social Media.** Let your users share their message via Facebook AND Twitter with the Social Media option.
- **Email and USB.** If you're looking for a practical way to share content, users can send to any email address or save to a USB key.

Additional Options:

Object Recognition. (\$1,000 per object tag) Programming unique tags into your application will bring up exclusive content when the tag is touched to the surface. The tag can be affixed to a physical object, and the content expansion could be a video launch, web browser, even an interactive booklet! (*This feature is only compatible with the Samsung SUR40 with Microsoft Pixelsense*).

Web Browser. (\$5,000 additional) Access a browser directly through your application with just the touch of a button. The default browser will be your homepage or whatever page you choose. (*This feature uses Google Chrome*).

Screen Saver. (\$1,000 additional) Content must be provided in WMV video file, Screen Saver will begin when application goes idle.

XPS Converter. (\$3,000 additional) Automatically converts Microsoft items such as Excel, Word, Powerpoint, to readable XPS format.

*Windows 8 desktop only.

All content is provided by customer. Content can be changed locally on the unit, or a Content Management System on the cloud can be purchased for an additional \$3,000 fee. The application fee is valid for 5 licenses on any Windows® 7 or 8* compatible devices. Additional licenses are \$1,000 per unit.
